Default document

This PDF is loaded into every new viewer session from a URL (DefaultDocumentUri in DocuViewareREST/appsettings.json).

Server documents

Pick a file in the top bar and click Load in viewer. The DocuVieware server reads it, renders the pages and sends only images to the browser.

Formats

PDF, Office, images, emails (EML, MSG) and text render natively. XML goes through a small custom action and is rendered as text.
